- Out source manufacturing resources.
- Global integration capabilities
- Export and import capabilities
- 3D Engineering drawing, modeling and FEA analysis.
- Ultrasonic weld testing.

Continuous Steel Cord

Stronger OTR Design

Overlapping Welded Cord

Weaker / Flawed Design

Rubber Tracks

OTR Wheel Engineering offers replacement rubber tracks and undercarriage parts for Compact Track Loaders, Skid Steers, Mini Excavators, and other models. These are tracks designed for your machine and have proven history and hours in the field.

Continuous belt technology balances strength and flexibility throughout the rubber track to minimize wear and maximize efficiency during the equipment's operation. Our tracks use true continuous cord technology so there is not a weld point that would equal a weak point in the tracks causing premature breaks.

WARRANTY POLICY
(LIMITED)

From customer service, dependability and quality products OTR has been an advantage to our gaining market share amongst the rubber track business in Louisiana. We know our customers put these tracks to the test and they hold up strong. The sales team at OTR makes our ordering tracks easy and ship in a timely manner. Along with assisting us with product knowledge and the capability to train the customer OTR has been there for us. There is no question for us that this is the best track on the market."

Mike Miller
Commercial Tire
Baton Rouge

TRACK PATTERNS

Our customer replaces tracks in pairs on his machine and requested that we sell him a set of aftermarket tracks from OTR. This customer has also said that from now on, we will have all of his track business and has requested that we stock OTR tracks for his machines instead of the Takeuchi (Bridgestone) brand. This may not sound like a great big deal, however when you consider that this customer owns 20 Takeuchi TL150 machines, you can see that it is a big deal to us. Thanks goes out to you for finding OTR and also to OTR for making a quality product at a competitive price.

HIGH QUALITY PRODUCTS

MANUFACTURER'S DEFECTS

Continuous Rubber Belt Tracks are warranted to be free of defects in material and workmanship for one (1) year prorated from the date of invoice, unless otherwise outlined in the disclaimer below.*

PREMATURE WEAR

Continuous Rubber Belt tracks are covered against premature wear for a period of one (1) year from the date of invoice. Original tread life is considered completed when the track has 10% or less of remaining tread in any position of its original tread depth, in any portion of its original tread design. Premature wear will be pro-rated in millimeter increments. Premature wear does not cover incidents of abuse as stated in the disclaimer below. The customer will be given the percentage warranty based on wear factor. Premature tread wear in the first six (6) months will be a 100% warranty if the track has been determined not to have been abused.

DISCLAIMER

OTR Wheel Eng Inc. is not responsible for any costs of repair on the machine or downtime due to track failure. OTR Wheel Eng, Inc. is not responsible for any lost revenues for rental, sale or otherwise, due to downtime because of a pending warranty issue. OTR Wheel Eng's responsibility is only for the rubber track and assumes no responsibility for any damages to equipment and/or property. All shipping costs are the responsibility of the customer, unless warranty takes place within the first sixty (60) days of the date of invoice, in which case, OTR Wheel Eng. is responsible for freight costs. All tracks should be installed based on OEM Service Manual Specifications. Any damage done to tracks not installed and tensioned to OEM specifications will be deemed the responsibility of the customer and will not be covered under this warranty. Undercarriage components must be checked before installation of any new rubber tracks to be certain the components are within the OEM specifications as well. Undercarriages with more than 600 hours of operation should be checked before installation. If the undercarriage has 1000 operating hours or more, the sprockets and idler wheels should be replaced before the installation of the new rubber tracks. Worn undercarriages will cause improper wear of the links (inserted metal pieces) of the rubber tracks, and will void this warranty. This warranty does not cover excessive wear or abuse as deemed by Factory Engineers. Continuous rubber belt tracks exposed to "severe environments" such as fire, demolition applications, concrete destruction, petroleum environments, steel scrap yards, rock quarries, or environments where stumps or debris are present, will not be considered. In addition, if machines running these tracks are retrofitted with concrete breakers or concrete cutters, the warranty is void. If machines are run predominantly on improved surfaces such as concrete and asphalt, the warranty is void. OTR Wheel Eng reserves the right to inspect all rubber tracks requesting warranty. All rubber tracks needing warranty adjustment must be retained until warranty has been issued by OTR Wheel Eng Inc. OTR Wheel Eng reserves the right to have the rubber track(s) in question shipped back to the OTR Wheel warehouse for further inspection. Tracks deemed to be warrantable will be replaced with another track of the same quality by OTR Wheel Eng. If there is not a comparable replacement track available at the time of approval, the customer will be issued a credit towards their account for the approved warranty amount. Freight is not the responsibility of OTR Wheel Eng.

WARRANTY EXCEPTIONS

(Rubber tracks not covered under this warranty.) Our "standard" tracks in the following sizes are not covered under this one (1) year prorated warranty: 320x84, 320x86, 450x84, 450x86, 450x100, 500x90, 600x100, 700x100, and 750x100. These "standard" skid steer rubber tracks have a ninety (90) day limited warranty against manufacturer's defects. For steel cord failures on these tracks, the warranty period is also ninety (90) days. A prorated warranty may be considered for up to 180 days, if proof of new sprockets at install is provided. ("Premium" skid steer tracks in these sizes are covered under this one (1) year prorated warranty.)

HOW TO FILE A CLAIM

If you believe you have a claim for warranty, contact a OTR Wheel Eng Customer Service Representative Cindy Turner or Don Chambers immediately to receive a Warranty Claim Form. Complete the claim form in its entirety. Claim forms not completed cannot be considered for warranty. All claim forms must be submitted with pictures of both the damage and the track's serial number within five (5) days of the failure. Please submit only one track per claim form. A replacement track(s) can be shipped immediately upon receipt of pictures and completed claim form(s). Please note: the replacement track(s) will be invoiced at the original billing price. Upon approval of a warranty claim, a credit memo will then be issued to the customer for the amount of the warranty, unless otherwise specified in this warranty statement.

Request for claims forms and pictures can be emailed to cindy.turner@otrwheel.com or don.chambers@otrwheel.com, also please supply OTR invoice number. No Product will be accepted into OTR Warehouse without a RMA Number.
